TRANSFER FOR ACCESSORIES AND CLEATS

Linear transfer system which permits the integrated production of accessories in an automatic manner starting from the extruded aluminium piece. The operator has simply to load the bar and set the cutting pitch, the machine then automatically undertakes the production cycle consisting of drilling/tapping, shearing and final cut, the finished part being automatically unloaded.

- 1) AUTOMATICALLY LOADING
- 2) DRILLING
- 3) CUTTING
- 4) TAPPING
- 5) SHEARING
- 6) AUTOMATICALLY UNLOADING

TIMES PER PIECE: **8 SEC**
